

## Geography Summer challenge

“Handy Maps” How familiar are you with OS maps? Our summer challenge for you is to create an OS map of your local area.

The instructions are simple:

- You need to draw round your hand and then get thinking!!
- Essential components
  - There needs to be a compass
  - A key (and each symbol used has to be the correct OS map symbol)
  - Add some colour

Previous examples include - knuckles as mountain peaks (carefully plotted with contour lines), veins as rivers, and finger nails as areas of coniferous woodlands.

### Help

OS map symbols explained: [Guide to OS Maps symbols | OS GetOutside \(ordnancesurvey.co.uk\)](https://www.ordnancesurvey.co.uk/guide-to-os-maps-symbols/)

Bing maps also has an OS map layer, if you need further inspiration <https://www.bing.com/maps/> press the key and select Ordnance survey
